Life starts with pure water

INDUSTRIAL & LABORATORY WATER SOLUTIONS

We provide a wide range of
high purity water solutions
manufactured with advanced technology
and stringent quality control
for critical applications.

Packaged Drinking Water

Our premium packaged drinking water series is engineered for optimal hydration and crisp, refreshing taste. Sourced from deep-bed mineral aquifers, the water undergoes an extensive purification process before being re-mineralized with essential electrolytes to support active lifestyles and general well-being.

DM WATER (DEMINERALIZED)

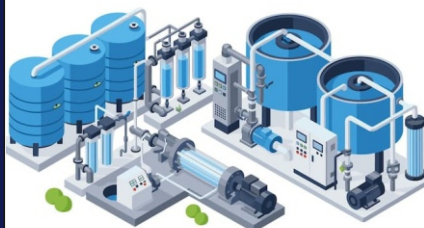

water with minerals
removed using
ion exchange
process.

APPLICATIONS

Boilers
Cooling Towers
Industrial Processes
Battery Manufacturing
Textile Industry

KEY BENEFITS

Prevents Scale Formation
Reduces Corrosion
Improves Equipment Life
Consistent Performance
Cost Effective

DISTILLED WATER

Highly purified water
obtained by distillation
process. Free from
bacteria,
salts & impurities.

APPLICATIONS

Laboratories
Pharmaceuticals
Research & Development
Medical & Diagnostics
Steam Sterilization

KEY BENEFITS

High Purity
Zero Microbial Content
Low Conductivity
Ideal for Critical Use
Consistent Quality

DEIONIZED WATER (DI WATER)

Water with all
ionic impurities
removed using
advanced ion
exchange technology.

APPLICATIONS

Electronics Industry
Pharmaceuticals
Laboratories
Semiconductor Industry
Power Plants

KEY BENEFITS

Very Low Conductivity
High Purity Level
Prevents Contamination
Protects Sensitive Systems
Ideal For Critical Processes

RO WATER
Purified by advanced
Reverse Osmosis
Technology to remove
dissolved salts,
bacteria and impurities.

APPLICATIONS

Food & Beverage
General Industries
Laboratories
Process Water
Domestic Use

KEY BENEFITS

Reduces TDS
Removes Harmful Impurities
Improves Taste & Quality
Safe & Reliable
Low Maintenance
